

SYLLABUS 2018/2019

Level of study	Master's Course
----------------	-----------------

Course title in Ukraine	Комп'ютерні методи обробки сигналів		
Course title in English	Computer methods of signal processing		
Course code		ECTS credits	4
Lecturer(s)	PhD. Andreev M.V. Email address: fftkaf@i.ua		

Course objectives (learning outcomes)	The purpose of the course is to study and master students corresponding specialty of methods of representation and analysis of characteristics of various signals, and as well as the construction of linear discrete and digital signal processing devices.
---------------------------------------	--

Prerequisites:

Knowledge	Knowledge of signal and circuit theory, electromagnetic theory on the level of bachelor of physics or applied physics.
Skills	The skills to use the physics conceptions for practical applications.
Courses completed	The bachelor of physics or applied physics.

Learning effects:

	Learning effects of the course	Relation of the learning effects to the specialization
Knowledge	W01 Identification and classification of signals; W02 Spectral representations and transformations; W03 Basis of sampling; W04 Difference in the methods of presentation and processing of analog and discrete signals; W05 Methods for describing analog and discrete signal processing systems; W06 The basic algorithms of digital filtering and smoothing; W07 Algorithms of rapid spectral transformations; W08 Structures of digital filters; W09 Basic methods and algorithms for designing digital filters; W10 Problems that arise when digitally processing signals.	W01 – W10

	Learning effects of the course	Relation of the learning effects to the specialization
Skills	U01 Use modern software systems that allow automate digital signal processing; U02 To make spectral transformations in different bases; U03 To use fast algorithms for spectral transformations; U04 To sample a variety of signals; U05 To perform analog filtering and smoothing; U06 Perform digital filtering and smoothing; U07 To use algorithms of rapid spectral transformations; U08 Synthesize the structure of digital filters; U09 Calculate analog and digital filters with specified characteristics; U10 Choose the method of designing the digital filter, which is the most suitable solution applied task; U11 To study the quality of the developed filter by simulation.	U01 – U07

	Learning effects of the course	Relation of the learning effects to the specialization
	K01. A student has the creativity and the ability to conceptual thinking. K02 A student is able to present and justify the personal point of view. K03 A student is able to use the information technologies for the communication with the scientific community. K04 A student is aimed to expand personal knowledge and skills. K05 A student has the legal erudition. K06 A student concerned about the environmental safety of physical experiment.	K01 –K06

Course organization:

Form of classes	Lecture (W)	Group-exercises							
		A (large group)	K (small group)	L (Lab)	S (Seminar)	P (Project)	Exam		
Contact hours	14			14			Z		
Semester	2								
Language	English, Ukrainian								

Teaching methods:

Classes will be performed in tutorial system on a weekly basis using multimedia presentation and internet in a form of the lectures open for discussion and questions.
 In-class exercises are designed to probe knowledge with emphasis on how well students have understood the underlying topics of course.
 The students will prepare two of individual presentation.

Assessment methods:

	E – learning	Didactic games	Classes in schools	Field classes	Laboratory tasks	Individual project	Group project	Discussion participation	Student's presentation	assignment (essay)	Oral exam	Written exam	Test
W01								x					X
W02						x		x	x				X
W03						x		x					X
W04						x		x	x				X
W05								x					X
W06						x		x	x				X
W07						x		x					X
W08						x		x	x				X
W09								x					X

W10						x		x	x				X
U01						x	x	x					X
U02						x	x	x					X
U03						x	x	x					X
U04						x	x	x					X
U05						x	x	x					X
U06						x	x	x					X
U07						x	x	x					X
U08						x	x	x					X
U09						x	x	x					X
U10						x	x	x					X
U11						x	x	x					X
K01						x	x	x					X
K02						x	x	x	x				X
K03						x	x	x	x				X
K04						x	x	x	x				X
K05						x	x						X
K06							x						X

Assessment criteria:

Grades	<p>The grading scale will be as follows:</p> <p>90 – 100 % - A including A- excellent (eq. in Ukraine: відмінно (very good))</p> <p>82–89 % : B including B – very good (eq. in Ukraine: добре (good))</p> <p>74–81 %: C including C – good (eq. in Ukraine: добре (good))</p> <p>64–73 %: D including D – satisfactory (eq. in Ukraine: задовільно (satisfactory))</p> <p>60–63 %: E including E – acceptable (eq. in Ukraine: задовільно (satisfactory))</p> <p>< 59 %: F failed (eq. in Ukraine: незадовільно (unsatisfactory))</p>
Criteria	<p>A. A student knows all terms and concepts mentioned in W1-W4, U1- U4 and K1-K6. A student can work without any assistances, his/her knowledge's are creative and easily applied to decision of specific problem.</p> <p>B. A student knows all terms and concepts mentioned in W1-W4, U1- U4 and K1-K6, yet needs a little help when decision of specific problem.</p> <p>C. A student knows all terms and concepts mentioned in W1-W4, U1- U4 and K1-K6, however needs a help when decision of specific problem.</p> <p>D. A student knows the most of terms and concepts mentioned in W1-W4, U1- U4 and K1-K6 and has difficulty in decision of specific problem.</p> <p>E. A student knows only several terms and concepts mentioned in W1-W4, U1- U4 and K1-K6 and can solve only a simple problem.</p> <p>F. A student does not know most of terms and concepts mentioned in W1-W4, he/she did not reach the satisfactory level of knowledge this course.</p>

Course content (topic list):

Topics	<p>W1. Purpose and objectives of the course.</p> <p>W2. Fourier series.</p> <p>W3. Fourier transform.</p> <p>W4. Random Signals</p> <p>W5. Discrete signals.</p> <p>W6. Method of spectral analysis of discrete signals.</p> <p>W7. Spectral analysis using a fast Fourier transform.</p> <p>W8. Analog systems.</p> <p>W9. Principles of digital filtering.</p> <p>W10. Recursive and non-recursive discrete filters.</p> <p>W11. Designing discrete filters.</p> <p>W12. Quantization effects in digital systems.</p>

Estimation of the total working time of students:

Contact hours	Lectures	14
	Lab	14
	Other (consultation, meetings)	32
Students' work hours (without the lecturer)	Reading books and preparation for the lectures	15
	Preparation to the lab	15
	Preparation of an individual presentation	10
	Preparation to the exam	
Total works' hours		100
ECTS credits 1 ECTS=25h		4
