Deadline for manuscript
submissions:

5 July 2020

Message from the Guest Editor

Perovskite materials have important physical properties, many of which are used in modern applications. Studying their phase transitions provides useful ways to understand the origin of their properties and thus propose new materials. A fundamental understanding of the crystal structure, electronic structure, electronic processes, phase boundaries, and phase transformations underline the development of perovskite systems with improved or novel features that can lead to groundbreaking applications.

The current issue will be chiefly devoted to the characterization of the phase transitions in materials with a perovskite structure, presenting new experimental and theoretical advances. Scientists working in a wide range of disciplines are invited to contribute to this issue.

Special Issue

Editor-in-Chief

Prof. Dr. Helmut Cölfen

Physical Chemistry, Universität
Konstanz, Germany

Message from the Editor-in-Chief

Crystals are a very important class of structured material, both from a scientific and technological viewpoint. In 2011, the Nobel Prize in Chemistry was awarded to Dan Schechtman for his work on quasicrystals. Our journal already expresses in its name *Crystals* that its focus centers around all aspects of this class of materials, which has fascinated humankind from its beginning. Despite decades of research on crystals, it remains a hot and fascinating research topic.

Crystals is a good platform for dissemination of knowledge in this area.

Author Benefits

Open Access free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: Indexed by the **Science Citation Index Expanded** (SCIE-Web of Science), Scopus, SciFinder (CAS), [Inspec \(IET\)](#), Current Contents - Physical, Chemical & Earth Sciences and other databases.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 13.3 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2019).
